

Capture. Produce. Deliver.

**GCV**  ANYWHERE

## Direct, low latency control of a Game Creek Mobile Unit from *Anywhere*

Custom IP platform leveraging existing fast-forward technology and 15 years of engineering expertise in remote command and control and media over IP networks.

## IP Applications

Commentary & Announce  
EVS Operator Control  
Robotic Camera  
Video Control  
IP Audio

Communications  
Router Control  
Video & Audio Monitoring  
Graphics Operation  
Contribution & Transport

## Logistical Advantages

Reduce on-site personnel and travel  
Reduce venue bandwidth costs by keeping contribution on site  
Retain full on-site production resources  
Keep fixed facility staff and equipment costs low  
Full control of production remotely  
Game Creek Flexibility

## Example Remote Scenario

## GCV Anywhere Technical Features

Cellular connectivity for command and control

Earlier uptime, remote admin, emergency backup

250 ms encoding/decoding latency

Fleet compatibility - ubiquitous throughout the GCV fleet and other mobile facilities providers

Layer 3 IP routing infrastructure across the fleet with integrated VPN

Full production resources available via remote IP control - no compromises

Transport of multiviewers & command/control, low bandwidth/latency monitoring or remote contribution
